This image shows step 8 of a LEGO assembly. The main view is a top-down perspective of a structure built on a large green 16x32 Technic baseplate. The structure consists of a yellow 1x5 Technic beam forming the main wall, with a grey 1x3 Technic beam attached to its side. A black 1x3 Technic beam is being attached to the top of the yellow beam. An inset diagram in the top right corner shows the assembly process: a black 1x3 Technic beam is being attached to a yellow 1x5 Technic beam using two red pins. The pins are shown being inserted into the holes of the yellow beam and the black beam.
